SKINPULSE S.H.R. baby

with *e-motion* Technology

NEW S.H.R. Technology: **SUPER HAIR REMOVAL**

Unlike traditional laser and IPL technologies S.H.R. uses rapid low level energies that provide a safer delivery in the destruction of hair follicles. The treatment of the targeted area by "sweeping" the *e-motion* hand piece ensures that treatment times can be up to 3 x quicker than before. This proven treatment method of incremental heating delivers a better more efficient clinical results than traditional laser and IPL methods. This "direct to target" S.H.R. application is pain free and enables the successful treatment of blonde and, in part even white hair, tanned and dark skins equally as efficiently"

- ✓ Pain Free Super Hair Removal
- ✓ 3 x Faster & Profitable
- ✓ All Skin, All Hair, All Year
- ✓ Portable

SkinPULSE S.H.R. Endorsed by Practitioners - Loved by Clients

"We absolutely love our latest device, the SkinPULSE S.H.R. - we are able to treat all skin types, all hair colours, all year round and best of all, it is pain free and much quicker than any other machine that we have ever owned before. Our patients also love it as much as we do as results are better and the treatment is so much quicker and more comfortable. Best of all is the price, we would have expected to pay significantly more for technology as good as this and it is a fraction of the cost of similar machines we were looking at, it has paid for itself within 3 months of owning it! I would highly recommend the SkinPULSE S.H.R. to patients and practitioners."

Dr Martyn King & Sharon King RN NIP The Cosmedico Clinic - Tamworth

The Next Generation Hair Treatment is Here

SAFE - EFFECTIVE - PAINLESS

Technical Data
